Inspection Issue Log

Origin:	**R**equirements, **D**esign, **C**onstruction, **T**esting
Type:	**M**issing, **W**rong, **E**xtra, **U**sability, **P**erformance, **S**tyle, **C**larity, **Q**uestion
Severity:	**M**ajor, **m**inor

Project: ___Space Traders Team 27_____

Meeting Date: ____November 22, 2019_____

Recorder: ____Anshul Agrawal_____

Defects Found: ____ Major, ____ minor

Defects Corrected: ____ Major ____ minor

	Origin	Type	Severity	Location	Description
1	Construction	VC	minor	All src files with JFrames	the frame variable used is always called the exact same thing regardless of its current function, which means it is not very descriptive.
2	Construction	FD	minor	UI classes	All UI classes' constructors can be package private. It is suspected that many other methods could be package private too.
3	Construction	CD	minor	Ship class	Ship class can be static.
4	Construction	FD	minor	UI classes	UI classes could be made more succinct by reusing methods for creating JFrames and other Swing components.
5	Construction	IO	minor	WelcomeScreen.java	Most inputs are sanitized but it is possible that the program may throw IO Exceptions for some unknown inputs
6	Construction	CM	minor	All classes	Code is not very well commented, Javadocs missing
7	Construction	LP	minor	UI classes	Methods longer than 60 lines exist in most classes, mainly due to the creation of JFrames and Swing components.
8	Construction	MO	minor	All classes	Repetitive code in creation of UI
9	Construction	PE	minor	Universe class	Could use a HashMap to organize the regions and make lookup faster
